CORE COMPETENCIES

- Frontend Architecture & Engineering
- React Native & React.js Development
- Cross-Platform Mobile Application Development
- AI/LLM Integration & Conversational Systems
- Frontend Performance Optimization
- Real-Time Communication & WebRTC Solutions
- Enterprise Application Development
- Technical Debt Reduction & Code Modernization

TECHNICAL SKILLS

Frontend Technologies: React Native, React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Expo

State Management & API Integration: Redux Toolkit, Context API, TanStack Query, REST APIs, WebSockets, API Integrations

AI & Real-Time Communication: OpenAI APIs, Claude APIs, Conversational AI, STT/TTS Pipelines, WebRTC

DevOps, Deployment & Collaboration Tools: Firebase, Firebase Crashlytics, GitHub Actions, EAS Builds, TestFlight, GitHub, GitLab, Bitbucket

Development Tools & Frameworks: Node.js, Babel, ESLint, Cursor, Copilot

Testing & Monitoring: Jest, Detox, Unit Testing

Manpreet Singh

Sr. Frontend Software Engineer | React Native & React.js Specialist

To contribute as a Senior Frontend Engineer in building scalable, high-performance, and AI-enabled digital platforms while leveraging expertise in frontend architecture, React ecosystems, and enterprise application modernization across product-driven organizations.

PROFILE SUMMARY

- Senior Frontend Software Engineer with over **9 Years** of experience in frontend engineering, cross-platform mobile application development, and enterprise web application delivery across **fintech, banking, healthcare, e-commerce, and AI-driven technology environments**.
- Experienced in building scalable mobile and web applications using **React Native, React.js, Next.js, and TypeScript** with strong exposure to enterprise-grade frontend architecture and production systems.
- Specialized in **AI/LLM integrations, conversational AI systems, WebRTC-based real-time communication platforms, and STT/TTS pipelines** along with frontend modernization initiatives and reusable component systems.
- Proven expertise in resolving production-critical issues including rendering bottlenecks, memory leaks, application crashes, frontend scalability concerns, and **performance optimization across high-traffic enterprise applications**.
- Experienced in mentoring junior developers, collaborating with Product, Backend, QA, and DevOps teams, and contributing to **frontend engineering standards, Agile delivery environments, and technical debt reduction initiatives**.

KEY PROJECTS

HelloBible

- Built AI-powered conversational systems using LLM APIs and real-time communication pipelines.
- Implemented STT/TTS functionality with streaming AI responses and interruption handling mechanisms.
- Designed conversational context workflow and prompt engineering strategies.
- Optimized real-time interaction performance for smoother user experiences.

IDFC First Bank

- Delivered secure mobile and web banking applications featuring payments, account management, fund transfers, and dispute management workflow using React Native and React.js.
- Built scalable workflow automation systems and enterprise web portal functionalities through secure API integrations.
- Improved application responsiveness and production reliability across critical banking user workflow.

Medipyxis

- Developed healthcare workflow modules and operational dashboards.
- Built workflow automation tools, billing-related systems, and role-based frontend experiences.
- Improved operational workflow management through centralized frontend systems.
- Focused on reusable frontend architecture, performance optimization, and secure healthcare data handling.

WORK EXPERIENCE

Senior Frontend Software Engineer – Freelancer | Sep 2025 – Present

- Leading frontend architecture and development of scalable AI-powered mobile and web applications using React Native, React.js, and TypeScript.
- Integrating OpenAI and Claude APIs to build conversational AI systems with streaming responses and workflow automation capabilities.
- Implementing STT/TTS pipelines and WebRTC-based communication systems for real-time voice interaction experiences.
- Collaborating with Backend, Product, QA, and Leadership teams to deliver enterprise-grade production applications.

SOFT SKILLS

Cross-Functional Collaboration

Technical Mentorship

Analytical Problem Solving

Agile Team Coordination

EDUCATION

- **B.Tech. – Electronics & Telecommunication Engineering**
Chitkara University | 2015

PERSONAL DETAILS

Date of Birth: 1st February 1993
Current Location: Chandigarh, India
Languages: English, Hindi, Punjabi

- Developed AI-enabled conversational workflow that improved user interaction efficiency by 30% through streaming response optimization and real-time communication enhancements.
- Introduced reusable frontend component systems that reduced repetitive development efforts by 40% and improved maintainability across enterprise applications.

Senior Consultant (React Native & React.js) – Xebia | Apr 2019 – Sep 2025 | Gurgaon

- Led frontend development and delivery of enterprise fintech and banking platforms using React Native and React.js.
- Designed scalable frontend architecture and reusable UI systems to improve engineering scalability and long-term maintainability.
- Modernized legacy React Native applications and contributed to large-scale codebase transformation initiatives.
- Resolved critical production issues including memory leaks, rendering bottlenecks, application crashes, and performance degradation.
- Mentored and onboarded junior frontend developers within a frontend team of approximately 3–4 members.
- Improved application responsiveness and rendering performance by 30% by resolving frontend bottlenecks, optimizing rendering cycles, and refactoring legacy React Native modules.
- Reduced production issues and application crashes by 25% through proactive debugging, monitoring, and frontend performance optimization initiatives.
- Contributed to frontend modernization initiatives that improved code maintainability and reduced technical debt across enterprise banking applications by 30%.

Key Projects:

Tonik Bank

- Modernized legacy React Native codebases and upgraded frontend architecture.
- Refactored native modules to improve application maintainability and scalability.

Ferns N Petals UAE

- Developed e-commerce mobile features with payment integrations and regional workflow.
- Improved application responsiveness & frontend rendering optimization across multiple devices.

TopMusic

- Improved application stability and frontend performance across mobile platforms.
- Supported ongoing feature enhancement and production maintenance activities.

React Native Developer – Freelancing | Apr 2019 – Sep 2021

- Developed and maintained scalable mobile and web applications across fintech, e-commerce, and media platforms.
- Integrated payment gateways, analytics systems, push notifications, and third-party SDKs into React Native applications.
- Enhanced frontend responsiveness and application stability, contributing to an estimated 35% improvement in overall user experience across multiple mobile applications.

Software Developer – Mobilyte Solutions Pvt. Ltd. | Jul 2018 – Apr 2019 | Punjab

- Built and maintained React Native mobile applications with focus on responsive UI development and frontend performance.

Junior Software Developer – Igniva Solutions | Mar 2017 – Mar 2018 | Punjab

- Contributed to React Native mobile application development, feature implementation, and production bug fixing activities.
