

Manpreet Singh

SENIOR MOBILE & FRONTEND ENGINEER

PROFILE SUMMARY

Senior Mobile & Frontend Engineer with 9+ years of experience building high-performance mobile and web applications using React Native, Expo, React.js, Next.js, Javascript and TypeScript. Specialized in scalable frontend architecture, AI/LLM integrations, WebRTC-based real-time systems, and enterprise-grade application development across fintech, banking, healthcare, e-commerce, and AI-driven platforms. Proven experience delivering production applications used by millions of users globally, modernizing legacy codebases, improving application stability, reducing technical debt, and optimizing release performance. Strong expertise in OpenAI/Claude integrations, conversational AI systems, streaming architectures, STT/TTS pipelines, reusable component systems, and cross-platform mobile development.

WORK EXPERIENCE

Senior Mobile & Frontend Engineer Freelancer

Sep 2025 - Present

- Leading frontend architecture and development of scalable AI-powered mobile and web applications using React Native, React.js, next.js and TypeScript.
- Integrated OpenAI and Claude APIs to build conversational AI systems with streaming responses and intelligent workflow automation.
- Implemented STT/TTS pipelines and WebRTC-based real-time communication systems for low-latency voice interactions.
- Improved application maintainability and frontend scalability by introducing reusable component systems and modular architecture.
- Collaborated with backend, product, QA, and leadership teams to deliver production-grade enterprise applications.
- Optimized rendering performance, application responsiveness, and production stability across large-scale projects.

Senior Consultant Xebia IT Architects

Sep 2021 - Sep 2025

- Led frontend development and delivery of enterprise fintech and banking platforms using React Native and React.js.
- Designed scalable frontend architecture and reusable UI systems to improve engineering scalability and maintainability.
- Modernized legacy web and mobile applications and contributed to large-scale codebase improvements.
- Resolved critical production issues including memory leaks, rendering bottlenecks, application crashes, and performance degradation.
- Improved application stability and release reliability through proactive debugging, monitoring, and production support.
- Worked closely with product, backend, QA, and DevOps teams in Agile environments to deliver high-impact business features.
- Conducted code reviews, mentored developers, and contributed to frontend engineering standards and best practices.

Senior Frontend & Mobile Engineer Parkulus Solutions

May 2019 - Sep 2021

- Developed and maintained scalable mobile and web applications across Healthcare, e-commerce, and media platforms.
- Integrated payment gateways, analytics systems, push notifications, and third-party SDKs.
- Built reusable UI components and optimized rendering performance across

Mohali

9 Years of experience

KEY SKILLS

- ✓ React.js
- ✓ React Native
- ✓ Nextjs
- ✓ Expo
- ✓ Redux
- ✓ Web Application Development
- ✓ Mobile Applications
- ✓ Mobile Application Development
- ✓ Android
- ✓ iOS
- ✓ Tailwind CSS
- ✓ HTML
- ✓ Css/Css3
- ✓ Material UI
- ✓ React Material UI
- ✓ Firebase
- ✓ Ci/Cd
- ✓ Continuous Integration and Continuous Delivery
- ✓ Ci / Cd Tools
- ✓ Github Actions
- ✓ Github Copilot
- ✓ Cursor
- ✓ Jest
- ✓ React Testing Library
- ✓ Detox
- ✓ Node.js
- ✓ Unit Testing
- ✓ Unit Test Cases
- ✓ Unit Test Automation

KEY ACHIEVEMENTS

Delivered enterprise mobile and web

applications.

- Collaborated with clients and cross-functional teams to deliver production-ready applications.

Software Engineer 2

Mobilyte Solutions pvt Ltd.

Jul 2018 - May 2019

- Built and maintained mobile and web applications with focus on responsive UI development and application performance.
- Integrated REST APIs and implemented scalable frontend features.
- Improved application responsiveness and resolved production issues across Android and iOS platforms.

Junior Software Engineer

Igniva Solutions

Mar 2017 - Jun 2018

Contributed to React Native mobile application development, feature implementation, and production bug fixing.

Assisted in improving application quality, UI consistency, and user experience.

Worked closely with senior developers on frontend feature delivery and application maintenance.

PROJECTS

IDFC first Bank (Mobile & Web)

36 Months

- Delivered secure mobile and web banking features including payments, account management, transfers, automate the Customer support process to reduce the cost of the organisation.
- Dispute management workflows.
- Built scalable internal workflow automation systems through secure API integrations.
- Contributed to secure and scalable frontend architecture for enterprise banking platforms.
- Improved application responsiveness and production reliability across critical user flows.
- Collaboration with Internal teams

R-DEE (ReactJs | React native)

30 Months

- Developed responsive web interfaces using React.js and cross-platform mobile applications using React Native for healthcare providers and patients.
- Built secure authentication and authorization flows, including role-based access control and protected healthcare data access.
- Integrated RESTful APIs for patient records, provider management, document sharing, notifications, and healthcare workflow automation.
- Developed reusable UI components and optimized application performance for large healthcare datasets and real-time updates.
- Implemented patient profile management, health record viewing, document upload/download, and consent management workflows.
- Implemented real-time notifications, error handling, loading states.
- Worked with healthcare compliance requirements, focusing on secure data transmission, access tracking.
- Participated in application deployment, testing, performance monitoring, and production issue resolution.

HelloBible

10 Months

- Built AI-powered conversational systems using LLM APIs and real-time communication pipelines.
- Implemented STT/TTS functionality with streaming AI responses and interruption handling.
- Designed conversational context workflows and prompt engineering strategies.
- Optimized real-time interaction performance for smoother user experiences.

applications used by millions of users globally. Led modernization of large react and react native codebases while maintaining production stability.

Reduced technical debt by implementing scalable frontend architecture and reusable component systems.

Improved application performance, responsiveness, and production reliability across enterprise platforms.

Built AI-powered conversational systems with real-time voice and streaming capabilities.

Implemented crash monitoring and analytics workflows using Firebase Crashlytics and Adobe Analytics.

Mentored developers and contributed to frontend engineering standards and architecture discussions.

CORE SKILLS

Frontend & Mobile

React Native, React.js, Next.js, Expo, TypeScript, JavaScript (ES6+), HTML5, CSS3, Cross-Platform Mobile Development, Responsive UI Development, Tailwind CSS, Material UI

State Management, APIs, DevOps, CI/CD & Tools

Redux Toolkit, Context API, TanStack Query, REST APIs, WebSockets, API Integrations, Firebase, Firebase Crashlytics, Adobe Analytics, GitHub Actions, EAS Builds, TestFlight, GitHub, GitLab, Bitbucket, Cursor, Copilot, Azure

AI & Real-Time Systems

OpenAI APIs, Claude APIs, Conversational AI, Prompt Engineering, STT/TTS Pipelines, Audio Streaming, WebRTC, Real-Time Communication Systems

Architecture & Performance

Scalable Frontend Architecture, Mobile Architecture, Reusable Component Systems, Performance Optimization, Rendering Optimization, Code Refactoring, Debugging, Production Support, Memory Leak Resolution

Testing & Quality

Jest, Detox, React testing library, Unit Testing, Debugging, Production Monitoring

CORE COMPETENCIES

- Frontend Architecture & Engineering
- React Native & React.js Development
- Cross-Platform Mobile Application Development
- AI/LLM Integration & Conversational Systems
- Frontend Performance Optimization
- Real-Time Communication & WebRTC Solutions
- Enterprise Application Development
- Technical Debt Reduction & Code

Tonik Bank

12 Months

- Modernized legacy React Native codebase and upgraded application architecture.
- Refactored native modules to improve maintainability and application performance.
- Resolved critical production crashes and optimized rendering performance.
- Improved release stability and long-term application scalability.

Ferns N Petals UAE

6 Months

- Developed e-commerce mobile features with payment integrations and region-specific workflows.
- Improved application responsiveness and optimized rendering performance across devices.
- Enhanced user experience for high-traffic e-commerce workflows.Improved application stability and optimized rendering performance.
- Resolved critical production issues and enhanced responsiveness across mobile platforms.
- Contributed to ongoing production maintenance and feature enhancements.

TopMusic

6 Months

- Improved application stability and optimized rendering performance.
- Resolved critical production issues and enhanced responsiveness across mobile platforms.
- Contributed to ongoing production maintenance and feature enhancements.

Medipyxis (Next.js)

6 Months

- Developed scalable healthcare workflow modules and operational dashboards for web using Next.js.
- Built workflow automation tools, role-based experiences, and billing-related frontend systems.
- Improved operational efficiency through centralized healthcare workflow management.
- Focused on reusable frontend architecture, performance optimization, and secure healthcare data handling.

EDUCATION

B.Tech / B.E. | Electronics and Telecommunication Engineering

2015

Chitkara University, Patiala

Grade - 7.18/10

Modernization

LANGUAGES

- English
- Hindi
- Punjabi
